Education

UNIVERSITY OF SAN FRANCISCO

Masters of Science, Major in Computer Science. GPA: 3.9/4.0

Recipient of USF MSCS Merit Scholarship and Tapia Conference Scholarship.

San Francisco, CA

August, 2021 – May, 2023

UNIVERSITY OF NEW SOUTH WALES

Bachelor of Science (Honors), Major in Applied Mathematics

Recipient of Australian Research Council, Center of Excellence for Climate Extremes Honors Scholarship.

Sydney, Australia

February, 2017 – May, 2021

Professional Experience

CLIMATE

San Francisco, CA

Software Engineer Intern

May 2022 – August 2022

- Launched a service integrating an internal *Event Platform* to replace *Kinesis* from *Amazon Web Services* in an S3 event notification data pipeline. Service was written in *Scala*.
- Resulted in 250 times greater data retention capability, unlimited data replay-ability, reduced AWS fees.
- Designed and documented the new service. Coordinated effort across multiple teams and was the first team in the company to onboard and integrate the new internal *Event Platform* powered by *Apache Pulsar*.

KALO

Sydney, Australia

Machine Learning Engineer Intern

January 2020 – February 2020

- Created text based supervised machine learning models with *Keras* and *Sci-Kit Learn* to categorize the fashion styles of all clothing items in Kalo's database (over 10,000) with an accuracy of over 60%.
- Abstracted and quantified the qualitative problem of recognizing fashion styles.

CHINESE ACADEMY OF SCIENCES – INSTITUTE OF AUTOMATION

Beijing, China

Data Scientist Intern

December, 2017 – February, 2018

- Collected major shareholder data of over 5000 public companies through automated scraping of news sites.
- Utilized *Beautifulsoup* and *Scrapy* for the scraping and *Pandas* for pre and post processing.

Academic Experience

UNIVERSITY OF NEW SOUTH WALES – CLIMATE CHANGE RESEARCH CENTER

Sydney, Australia

Research Assistant

May 2020 – August 2021

- Designed and conducted a year long research project investigating the interaction between moisture and convection.
- Developed process oriented diagnostic tools for data from various global climate models with *Numpy* and *XArray*.

Side Projects

Kafka Pub-Sub

October 2021 – December 2021

- Developed a publication-subscription framework with topics and replication between brokers using *Java*.
- Built many of Kafka's key functionalities, able to handle megabytes of writes per second.

Event Ticketing Website

November 2021 – December 2021

- Created an online ticketing platform for a project at USF using *Java*, *Jetty* and *HTML*.

BitTorrent Client in Scala

April 2022 – May 2022

- Built an application in *Scala* which uses the Torrent protocol to share files between hosts.
- Ensured connections are secure, data transfer in network is efficient and able to handle high loads of traffic.

Skills & Interests

Programming Languages: Scala, Java, Python, JavaScript, C, HTML, SQL, Git, Bash.

Technologies: AWS, Docker, Pandas, Numpy, Sci-Kit Learn, Keras, D3, Git, Mac, Linux, Windows.

Languages: English (Native), Mandarin (Native), French (Intermediate).

Interests: Music (Guitar, Violin, DJ), Martial Arts (Judo, Kickboxing), Traveling/Backpacking (40 countries).
